## City of Kinston Annual Operations and Performance Report 2015

### **Kinston Regional Water Reclamation Facility (KRWRF)**

NPDES	# NC0024236
Design Capacity	11.85 Million Gallons
Treatment Type	Johannesburg Process
Service Date	2006

#### **Facility Comments:**

The last annual inspection report for the Kinston Regional Water Reclamation Facility, dated November 13, 2014, was found to be in compliance with its discharge permit. There were no Notices of Violation during calendar year 2015.

### **SANITARY SEWER COLLECTION SYSTEM**

During calendar year 2015, the collection system reported two sanitary sewer overflows (SSO's).

Any spill of 1,000 gallons or more and any reaching surface waters are required to be reported to the DWQ.

On February 17, 2015, the City of Kinston had a wastewater spill of an estimated 7,500 gallons from manhole #4AH located south of the RR tracks between Laroque Ave. and Carey Road in Kinston, NC. The untreated wastewater spilled into a ditch that flows into the Neuse River. This spill was caused by debris in the sewer line and excessive rainfall of 3" within a 10 hour time frame.

On August 18, 2015, the City of Kinston had a wastewater spill of unknown gallons and duration from an aerial line that crosses the ditch on North Queen Street just south of the intersection of Airport Road near 49AE in Kinston, NC. The untreated wastewater spilled into the Adkins Branch. This spill was a result of both debris in the sewer line and a pipe failure (break).

The City of Kinston Public Services Department relieved the blockages, repaired the line, cleaned the surrounding area and notified the Division of Water Quality in both incidents.

Neither of the SSOs resulted in any fish kill or impairments of the surface waters.

The last annual inspection report for the collection system dated November 19, 2014.
