

**City Of Kinston**  
**Public Housing Authority Service**  
**Code: E13**

**Availability**

This Schedule is available for electricity supplied inside the city of Kinston when used for industrial purposes and the City does not own any equipment, other than metering equipment, on Customer's side of the point of delivery.

Generation may not be interconnected to the utility system or operated by the Customer with service provided under this Schedule without prior written approval from the City. The Customer must install equipment acceptable to the City to protect personnel performing maintenance or repairs and prevent damage to electric system facilities. The Customer is responsible for any injury or damage caused by the operation of such generation. The Customer's electric service is subject to immediate suspension without notice until adequate protection equipment is installed and approval for generation operation is obtained from the City.

**Applicability**

This Schedule is applicable to all electric service of the same available type supplied to Customer's premises at one point of delivery through one watt-hour meter.

**Type of Service**

The City will deliver to the Customer, at a delivery point mutually satisfactory to the Customer and the City, 60 cycle alternating current electricity of the phase and voltage generally available in the surrounding area.

When the Customer desires electricity of a phase or voltage not available, the Customer shall install and maintain at his own expense all necessary transforming equipment (exclusive of service conductors and metering equipment). In such instances, metering equipment shall be installed on the service side of transforming or other equipment.

Electricity supplied under this schedule is not available for resale, breakdown, standby or supplementary service.
