Kinston Public Services Gains Licensed Engineer

KINSTON – The City of Kinston's Public Services Department has gained another State-certified engineer. Ethan Green has been with the City of Kinston since August 2020. During this time, he has worked diligently to help address infrastructure needs in many areas, including water lines, sewer mains, drainage improvements, and streets.

As a licensed engineer, Green will be capable of signing and sealing his designs and completing other reports and documents for the city requiring a licensed engineer. With this new certification, Green will join Steve Miller, Department Head of Public Services, as the city's second engineer.

"I am proud of Ethan's accomplishments," stated Miller. "This will bring added value to the Public Services Department. It is great to see a product of Lenoir County achieve such a significant milestone and use his talents to make improvements that will benefit residents, businesses, and visitors!"
